“Noise Away”

DSP Noise Cancellation as easy as 1-2-3

ANEM - Amplified Noise Elimination Module

- 1 - Plug in Audio
- 2 - Connect Loudspeaker
- 3 - Connect Power

Giving You.....

Noise Free Listening

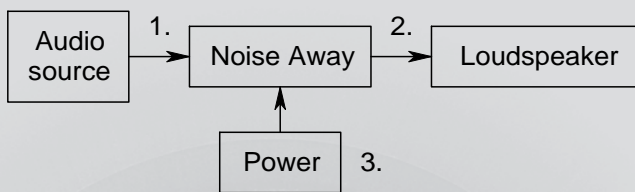

bhi "Noise Away"

Amplified Noise Elimination Module

3 easy steps to noise cancellation.

1. Plug in audio source
2. Connect loudspeaker
3. Connect power

Fit it on the rear...

The module simply fits in-line between the communications equipment and the loudspeaker. The **ANEM** is suitable for a variety of applications but is particularly useful for improving voice quality in amateur radio, removing unwanted QRM and QRN to give much improved readability and speech intelligibility across all bands. You can listen more clearly on SSB, UHF, VHF, HF and FM.

...on the side

The **ANEM** is easy to set up using the 3.5mm mono plug lead provided. For ease of use the modules functions are controlled by a microprocessor, enabling simple operation via two pushbuttons: power on/off audio bypass and DSP filter on/off. There are 4 or 8 levels of noise cancellation, selected via the pushbuttons on power up, and the last selected filter level remains in the memory if the power is removed. The **ANEM** comes boxed with a Fused DC power lead (2.1mm) and a 3.5mm mono plug lead 1.2m long, plus full operating instructions. Audio adapters are available to suit different connections. Velcro strips are provided for mounting the module in a suitable position on your extension speaker or radio equipment.

Features:

- Noise reduction 9 – 35dB
- Tone reduction 4 – 65 dB
- Power supply 12 – 15 V dc
- Input signal > 50mV
- Output load 2.5W 8ohms
- Current consumption 300mA
- Audio bandwidth 50 – 4.3KHz
- Dimensions (WxDxH) 100 x 61 x 41.5 mm
- 4 or 8 filter levels (selectable)
- Visual and audio indication of filter level
- Audio bypass when switched off

Order codes:

- ANEM** - Amplified 'Noise Away' module
- 1030-UKPA** – 12 V DC unregulated power supply
- ADP-P004** - Phono Plug-3.5mm Mono Socket
