

NEDSP1061

NEW

Noise Eliminating PCB module

The **NEDSP1061** noise eliminating PCB module, offers an off the shelf solution to noise cancellation. Its small size and variety of connection options provides a solution to a wide range of applications. The **NEDSP1061** eliminates noise and interference while minimising distortion to the audio without producing musical tones.

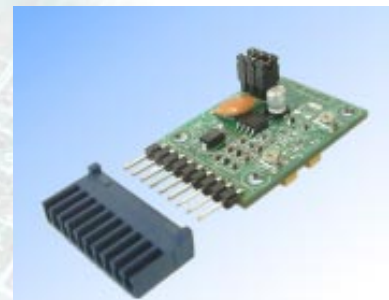

The PCB module allows the user to design in to new equipment, or retro-fit the revolutionary bhi noise cancellation.

Features:

- Fully Adaptive noise cancelling
- Minimum distortion to audio signal
- Noise cancellation 9- 35dB
- Wide audio bandwidth for natural sound
- Input and output sensitivity control
- Input overload indication
- 5 - 15Vdc operation
- Greatly improved signal to noise ratio
- Remote noise cancellation ON/OFF
- Preset or remotely set DSP level
- Mount horizontally or Vertically

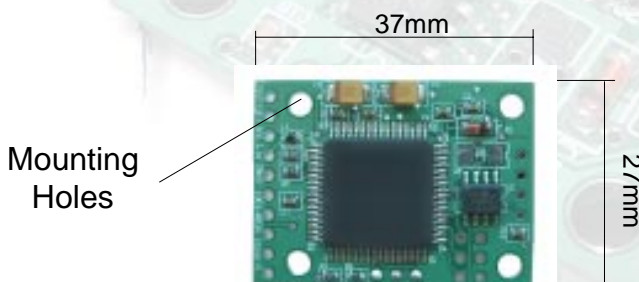

Plug - in Vertical

Horizontal fit - connector

Plug - in Horizontal

Mounting Holes
